## Upward Trend Seen By Local Merchant

Business conditions are improving, says C. N. Green of the Green Brothers store in Cameron.

A comparison, he says, shows that 1933 business thus far each month has shown an increase over the same period for last year. Mr. Green has a record extending over 34 years in business in Cameron. He has seen more than a third of a century of progress and experienced business depressions before.

At this time the store is selling merchandise at prices that are the lowest in 34 years. A study of the quotations will prove this statement, he says. The buying power of the dollar has increased materially and although circulation has been curtailed goods are much lower in price, thus equaling to a great extent the ratio of difference.

Green Bros. store, he says, is in no way associated or connected with any other business and has, for 34 years been a distinct and separate business.

Mr. Green has faith in Cameron and the future of this section and looks ahead for better times. The special bargain list advertised this week will bring many to his store. Always a believer in newspaper advertising, Mr. Green has made it pay in profits and volume at his store.

## WEDDING CELEBRATION ENDS IN FATAL SHOOTING OF ONE

Hisidor Martinez is being held in the County jail, for the fatal shooting of Marsilino Saccada, another Mexican early Sunday morning, one half mile from Maysfield on the Yager farm.

The shooting occurred at the home of Saccada, where they were having a dance and celebrating the marriage of his daughter.

## New Ford V-8 Shown Here

The fact that the great majority of motor car owners—both men and women—are mechanically minded, was conclusively demonstrated Saturday when the new Ford V-8 cylinder, 112-inch wheelbase motor cars were first placed on display in the showrooms of Hefley-Stedman Motor Company, Ford dealers, at Cameron.

The 75-horsepower V-8 cylinder engine, with its new aluminum cylinder heads and rubber mountings, the new double-channel, double-drop X-type frame, newly designed head and cowl lamps, bumpers and horn, skirtd front fenders, smaller wheels and larger tires appeared to attract fully as much attention as the new bodies with their flowing lines, distinctively modern design and luxurious interior appointments.

The new V-8 car is the fastest and most powerful car since Henry Ford launched into volume production of motor cars. It is exceedingly flexible in traffic and capable of a sustained speed of 80 miles an hour on the open road.

The secret of its power and alertness lies in the improved V-8 engine and its new cylinder head design. Because aluminum dissipates heat more rapidly, the all-aluminum cylinder head permits unusually high compression pressure which results in increased speed, power and smoothness, unusual acceleration and fuel economy.

The cylinder heads have combustion chambers of improved design and are fitted with new 18 millimeter spark plugs with high heat resistance qualities. The high heat conductivity of the head material also obviates the tendency toward detonation or knocking, eliminates "hot spots," and reduces carbon deposit.

The 90-degree type crankshaft is fully counterbalanced and the piston and connecting rod assemblies are matched in weight to produce unusual operating smoothness. The engine is fitted with downdraft carburetor, air intake silencer and diaphragm type fuel pump.

Through achievement of Ford engineers, the two cylinder blocks and crankcase are cast in a single piece, the cylinder blocks being set at an angle of 90 degrees. This design provides an exceptionally compact power plant. Basically the engine is

## MRS. LUCY MANNING BURIED AT MERIDIAN

Mr. and Mrs. M. G. Manning and family left Thursday morning for Meridian to attend the funeral of his mother at three o'clock that afternoon.

Mrs. Lucy Manning was born in England in September 1843 near London. She came to America and landed at Van Couver Island, and after a few years returned to England, later returning to the States, landing at San Francisco and came to San Antonio and lived there for a number of years, where she was married to a Mr. Stone. After his death she was married to Mr. Manning and subsequently moved to Meridian. After the death of Mr. Manning she had made her home with her daughter, Mrs. W. H. Butler, of Dallas.

She had often expressed a desire to live until she was 90 years old, and had she lived until September this fall would have achieved her desire. She had been in poor health for some time. Miss Mary Ellen Manning, daughter of Mr. and Mrs. M. G. Manning of Cameron, had spent most of the winter months with her grandmother, and was present at her passing.

Deceased is survived by two children by her first marriage, and two by her last, M. G. Manning of Cameron and Mrs. Butler of Dallas.

## Coughs

BY DR. WILLIAM J. SCHOLES

Quite often the victim of a more or less frequent dry cough tells how he or she has done everything that is usually advised for a "cold" but without relief. The favorite "sure cures" of neighbors and friends have failed to cure.

Now it is possible to have more than one cold during the season for colds. And anyone who develops a bronchitis is rather certain to cough. The ordinary attack of bronchitis, however, is somewhat self-limited. At first the cough is dry, perhaps painful. Later, as the course of the bronchitis tends to recovery, the cough becomes loose, or "productive," as it is called. The loose cough serves a useful purpose in removing material from the air-passages.

But it does not necessarily follow that everyone who coughs has a bronchitis, either acute or chronic. Nor does a cough that is more or less persistent, necessarily mean tuberculosis. For there are several causes of the symptom of cough aside from affections of the organs of respiration.

Varied Causes  
Irritation due to the inhalation of dust smoke and irritating vapors may cause cough. Constant exposure to any of these may cause a chronic cough.

Cough may be a symptom in certain forms of heart disease. In such cases, the heart lacks the power to properly pump the blood. Blood is dammed back into the lungs, causing a congestion. The resulting irritation causes an impulse to cough.

## YOU ARE DUE INCOME TO THE GOVERNMENT

Every single man or woman who earned as much as \$20 a week last year, 1932, will have to pay an income tax to Uncle Sam this year. Every married man, or woman who is head of a family who, earned \$50 a week in 1932, is also liable for income tax in 1933, unless there are minor children to be supported.

Treasury officials estimate that more than three and one half million persons who have never paid income tax to the Federal government are obligated to pay it under the law passed last year. And what is worrying the Treasury is the question: Do these taxpayers realize that they have got to report their last year's income and pay tax or go to jail or be fined?

It's an impossible game to beat, this Federal income tax. With luck some few may get away with invading it for a while, but when they are caught the penalties are severe, and the accrued tax is a lien that comes ahead of everything else—mortgages, state and local taxes, grocery bills and all. Uncle Sam's collectors of Internal Revenue have the right to garnishee the salary or wages of anyone liable for income tax and who does not pay it. The law gives the Federal courts the right to send to prison anybody who fails to report his 1932 income by the 15th of March, 1933.

The tax is not very high on small

### Forgets

This pretty young woman found herself in the lobby of a Houston hotel recently, unable to remember a single event in her past life. After newspapers published her picture, she was finally identified as Marjorie Cottle, 18. She still doesn't remember anything. Doctors claim her loss of memory resulted from mental strain.

incomes. If one is single and earned \$12,000 last year, the highest tax possible would be only \$8. And there are exemptions from that. The taxpayer can deduct from net income figures such items as money given to charity or church, taxes of any kind paid to Federal or local government, interest on business debts and certain kind of business losses.

A married man without children is allowed \$2,500 exemption; an unmarried person only \$1,000 exemption. Every employer is required to report to the Government how much was paid in salary and commissions

to each employee during the year. So the treasury has a practically complete record, which is sure to be followed up. When the Treasury agents overtake the individual who has failed to report taxable income, trouble is pretty certain to follow.

"The only safe plan for anyone who wants to avoid trouble," said one of the Treasury officials the other day, "is to send to the income Tax Unit at the Treasury Department, Washington, for the proper form to be filled out and filed. Form 1040-A for incomes below \$5,000 a year; form 1040 for income of \$5,000 or more." The proper form must be filed with the nearest collector of internal revenue by March 15, and at least one-quarter of the tax paid at that time.

### Child Welfare Stressed Before Parent-Teacher Association

"Conservation of the powers of youth is not an act of charity; it is an act of justice, common sense and true patriotism," contended Mrs. Niley Smith in an address before the Parent Teacher Association, last Thursday afternoon. She continued by saying: "The day will come when the community will make self-supporting, useful happy citizens out of its unfortunate victims of sin, accident and poverty, when it will make intelligent connections between the world and its people."

"Various influences mold the child. Some of these effect the body, some his mind, and some his character. Some are operative at home, others at school, and still some outside of either. Religion

stands paramount, wherever it is taught. The neglect of the teachings of Christ is a supremely important factor underlying all social problems. Until these principles are recognized and put into practice, there can be no fundamentally satisfactory cure for childhood problems.

"However well equipped a community may be with all these groups, it has provided for the normal child only. We must remember that a large number of children are under most abnormal conditions. The needs of all children should be kept in mind. No matter how faithful and careful and loving parents and teachers may be in their training and care and guidance of children, they cannot

alone prepare the citizens of tomorrow to take their proper place in the world. The influence of neighborhood relationships, must be considered and special provisions made for the handicapped child. Only an aroused public opinion can change or make good community conditions.

"If Texas continues to make the improvement in social and childhood conditions as she has in the past 15 or 20 years, it will not be her territory or resources alone but the manner in which each little neighborhood uses these resources as a means to an end. Power without discretion is dangerous. Effort without purpose is blind. Beauty without virtue is a menace. We are living at a time of golden opportunities, at a time when goodness is greatness and service is success.

"I believe there is enough child welfare interest in this one organization to make this community an ideal home for every child who lives within its corporation limits. When the child can find near at home, with companions of his own choice, opportunity for all that his ever desiring sphere of craving and interests demands, when his community including all groups, private, municipal, commercial, holds as its greatest asset the security and development of all of its children, when the spirit of the neighborhood reflects our most ideal teaching, then will the community minimize those behavior problems that handicap the lives of so many children.

"Our responsibility was expressed years ago by Jane Addams: 'We may either smother the divine fire of youth, or we may feed it. We may either stand stupidly staring as it sinks into murky fire of crime and flares into the intermittent blaze of folly, or we may tend it into a lambent flame with

power to make clean and bright our dingy city streets.'" venile Court Procedure," and told of the various methods of caring for dependent and delinquent children. He stressed the need of provision for adequate care of dependent children and called attention to the fact that there is no home or school where delinquent negro girls may be trained.

A pianologue was given by Misses Mary Kaywood Julian and Beulah Collier. Little Betty Jo Stidham also gave a reading.

Four sanitary pit-type toilet demonstrations will be given by C. M. Everts Jr., District Sanitary Engineer from the Department of Health, Austin, beginning Monday, February 20. The Home Demonstration Clubs are sponsoring these demonstrations, which are scheduled as follows: Monday, 9:30 a. m., Gause; Monday, 2 p. m., San Gabriel at the Harry Clark home; Tuesday, 9:30 a. m., the Tom Stidham home at Jones Prairie, and Tuesday afternoon, Ad Hall at the Frank Winkler place. All home demonstration clubs will send committees to attend demonstrations and return home and repeat the demonstration for their community. All surrounding and nearby communities are urged to attend one of these demonstrations. The R. F. C. funds may be used for labor in making conditions more sanitary at schools.

Two half days will be required to complete a demonstration, the second half will be given two days after the first half.

To encourage the construction of sanitary buildings, the County Health Committee consisting of Mrs. J. P. Love, Mrs. K. K. Robbins, and Dr. James Watson, is financing the making of two molds which will be used over the county by any one who wants them.

Cigar

... you can purchase enough natural gas to heat water for 10 baths; cook 5 good dinners for three people; or heat water for 70 morning shaves. . . .

Everyone knows that a five-cent cigar is not expensive . . . yet these same five pennies have a lot of power when it comes to buying natural gas service. Just think, with natural gas, you can prepare a real good meal for three people for a single penny! . . .

CONSTIPATION, with the annoying symptoms that usually come with it, cuts down organic force and disturbs normal health and well-being. A thorough cleansing of the digestive tract is of great assistance in the removal of sickening constipation symptoms.

When excessive accumulated waste matter disturbs and strains the muscles of the large intestines, rendering them temporarily unable to perform their wave-like evacuating movements, Theford's Black-Draught is useful in stimulating them to activity, which, again started, should continue regularly until some future disturbance interferes. In this way, Theford's Black-Draught is one of the TONIC laxatives, tending, as it does, to establish a regular habit of evacuation.

ing is irritation in the ear. The resulting cough may be severe and persistent. Other possible causes could be mentioned. But these will serve to illustrate the futility of attempting to treat all coughs as though they were caused by "colds."

It is probably true that most coughs are the results of affections of the organs of respiration. The point is that these are not the only possible causes. It is obvious that treatment for a cold, aside from the rest which is usually advised, will not greatly benefit a weak heart. Nor is such treatment likely to bring permanent relief when a cough is caused by some irritation in the ear.

THE woman who gives her organs the right stimulant need not worry about growing old.

Her system doesn't stagnate; her face doesn't age. She has the health and "pep" that come from a lively liver and strong, active bowels.

When you're sluggish and the system needs help, don't take a lot of "patent medicines." There's a famous doctor's prescription for just such cases, and every druggist keeps this standard preparation. It is made from fresh laxative herbs, active senna, and pure pepsin. Just ask for Dr. Caldwell's syrup pepsin. Take a little every day or so, until every organ in your body feels the big improvement.

The next time you have a bilious headache, or feel all bound-up, take this delicious syrup instead of the

usual cathartic. You'll be rid of all that poisonous waste, and you haven't weakened the bowels. You'll have a better appetite, and feel better in every way. The constant use of cathartics is often the cause of a sallow complexion and lines in the face. And so unnecessary!

Would you like to break yourself of the cathartic habit? At the same time building health and vigor that protects you from frequent sick spells, headaches, and colds? Get a big bottle of Dr. Caldwell's syrup pepsin today. Use often enough to avoid those attacks of constipation. When you feel weak and run-down or a coated tongue or bad breath warns you the bowels need to be stimulated. Give it to children instead of strong laxatives that sap their strength. It isn't expensive.

## Hints for the Household

### HOUSEHOLD HINTS

#### Tea Wagons

Save your steps. What's in a name? A tea wagon is, of course, useful for the service it is made for. But why not make it more useful? Here are few added uses for your tea cart.

1. Use cart to carry thing to and from kitchen in preparing a meal.
2. When washing windows on inside, place necessities on tea cart and wheel from window to window.
3. Use it for a mending table. Stack clothes on tea wagon that need mending after the weekly washing has been assorted. Wheel in room or onto porch or to any convenient spot in which to mend.
4. The work of cleaning days can be lightened by using tea cart to hold supplies.

### COOKING HINTS

#### Peanut and Cabbage Salad

This is a dandy winter salad: 2 cups of shredded cabbage. 1 small green pepper (cut up). 1 cup of chopped peanuts. Mix lightly. Blend with French dressing.

### Tomato Aspic Jelly

- 1-2 cup of cold water.
- 3 1-2 cups of canned tomatoes.
- Little onion.
- Little celery.
- Little cloves.
- Little salt.
- Few grains of cayenne.
- 2 tablespoons of vinegar.

Method: Soak gelatin in cold water a few minutes. Mix all other ingredients except vinegar. Boil 15 minutes. Add vinegar and dissolved gelatin.

Turn into large mold or individual molds. Serve on lettuce leaves. Garnish with egg and green pepper.

### BAKING HINTS

Core desired number of apples. Fill each cavity with brown sugar. Place a piece of butter on top of each apple. Place apple in baking pan. Surround apples with water to 1-2 inch depth. Add more sugar in water to make a syrup. Bake in moderate oven. Serve either plain or with whipped cream.

### Baked Onions

## Thousands of Women Have Taken Cardui on Their Mothers' Advice

It is an impressive fact that many women have said they learned of the value of Cardui from their mothers.

What stronger evidence of her confidence in a medicine could a mother have than that she advises her daughter to take it?

Cardui is given the credit for relieving so many cases of womanly suffering that it is widely and favorably known. Druggists, everywhere, sell it.

If you are weak, run-down, suffering monthly, take Cardui. Take it for a reasonable length of time and try it thoroughly. As your health improves, you will share the enthusiasm of thousands of women who have written to say: "Cardui helped me."
